GENERAL INSTRUCTIONS

Input™ is an organo-silicone penetrant/surfactant which enhances the activity of Answer®, Escort® and certain other herbicides.

DIRECTION OF USE

Input® use with Answer® and Escort®

With the exception of aerial application of Answer® to Gorse, Manuka and Kanuka, Input® should be used at a rate of 100 mL per 100 litres of spray solution (1 mL per litre). When applying Answer® by helicopter to Gorse, use Input® at 400 mL per 100 litres of water. When applying Answer® by helicopter to either Manuka or Kanuka, apply Input® at 2 litres per hectare.

Input® use with other herbicides

When using Granstar® or Harmony®, in a tank mix with glyphosate, to spray out old pasture before sowing a new pasture or crop, add Input® at 100 mL per 100 L. Only use Input® with other herbicides that recommend the addition of an organo-silicone penetrant. Use a rate of Input® as recommended on the herbicide label for the addition of an organo-silicone penetrant.
